

COLUMN CASE INVESTIGATIVE

IMPROVE INVESTIGATIVE CASE HANDLING!

Column Case Management offers a modern case management software, that helps organizations manage the life cycle of a case.

Individually, Column Case Management helps investigators stay organized, improves the collection of data, and improves case solvability rates.

KEY BENEFITS

- Easy to Use
- Unlimited Attachment Size
- Highly Secure and 100% Auditable
- Powerful Workflow Engine.
- Google Like Searching Capability.
- 360 view of Case (Link Analysis)
- Strong Reporting Engine.

From our inception, Column Case has helped public and private organizations transform how they conduct their investigations. Today, Column Case provides the following benefits

Document Management and Network File Sharing

Organizations can manage, index, and store large files and attachments into a care and an organized data structure in where users can coordinate their work and manage unstructured content such as Microsoft Office and PDF documents, HTML files, e-mail messages, images, forms – even audio and video files.

Rigorous Access and Audit Controls

Rigorous access and audit controls – including user, role, and group-level security, data encryption, and complete audit trails – promote information sharing

Increase Data Quality with our Validation and Rules Engine

Powerful data quality management tools use business rules and real-time logic to validate, cleanse, and integrate data. The result? Accurate, timely, and complete information that supports good decision making without compromising speed and efficiency.

Improve Information Access with our Search and Data Visualization Options

When you need to find information, you can securely search all sources, including documents, web pages, attachments, forms, and activity logs. You also have access to Column Visualization, a powerful data visualization technology included with Column Case Investigative. It's a groundbreaking tool that can help you uncover relationships among people, locations, property, vehicles, organizations, and other data elements.

Access to Up-to-the Minute Data with a Customizable, Web-based Report Console

Powerful reporting and dashboards consoles provide real-time performance metrics. The solution provides business intelligence by including a large number of standard reports and dashboards as well as the ability to create custom reports and ad-hoc queries. If rolled-up data demands an explanation, you can easily drill down for more detail. We can integrate with a wide variety of reporting solutions if you do not wish to introduce another reporting solution.

Increase Efficiency with Electronic Forms and Customizable Workflows

Built on, Column Case Investigative can automate manual, time-intensive activities while ensuring security and role-based access for the investigator

Workflow rules can mirror your current practices by sending notifications or information, creating or escalating assignments, requesting approvals, and updating data fields. The application creates traceable e-forms that can link to cases. Continually measure workflow effectiveness, making changes to deliver leading performance.

Whether you automate one process or all of them, you'll eliminate redundant tasks, reduce errors, speed approvals, and ensure compliance.

SOFTWARE-AS-A-SERVICES (SAAS)

SaaS allows organizations to reap the benefits of an integrated investigative case management solution with minimal installation and maintenance costs and without adding technical staff. Your SaaS-enabled case management solutions reside on Column's servers, and your users access them through secure internet connections.
